Video Editor

MyGov is the citizen engagement platform of the Government of India. It is an Independent Business Division under Digital India Corporation, a Section 8 company under the Ministry of Electronics & Information Technology. Details about MyGov can be seen at https://MyGov.in.

MyGov is looking for a Senior Video Editor who can create compelling and high-quality video content across digital and social media platforms. Your primary focus will be to transform ideas, scripts and raw footage into engaging short-form and long-form videos by combining strong visual storytelling with modern, AI-powered video production workflows.

An ideal candidate should have relevant experience in video editing and post-production, with strong expertise in editing, motion graphics, colour grading, sound design, visual effects and storytelling.

You will be under probation for the first 3 months from the date of joining. It is not mandatory for MyGov to absorb you or offer you a regular contract after the completion of the probation period. The period of probation can be reduced or increased by MyGov and shall be solely based upon your performance.

After successful completion of the initial contract period, a regular contract will be given.

Please review the position listed below and apply in the form given in this notification.

Published Date: 17th September 2026

Position: Video Editor

No. of Position(s): 01

Qualification: Graduate/Postgraduate preferably in film, video production or communications

Years of Experience: 10-15 years

Roles & Responsibilities:

- Conceptualise, edit and deliver high-quality short-form and long-form video content for digital and social media platforms.
- Transform scripts, ideas, raw footage and creative briefs into compelling visual stories aligned with communication objectives.
- Lead end-to-end post-production, including video editing, motion graphics, colour correction and grading, sound design, compositing and visual effects.
- Create platform-native video content optimised for different formats, audiences and digital platforms.
- Use AI-powered tools and emerging technologies to improve video production workflows, enhance creative possibilities and accelerate turnaround time.
- Experiment with generative AI and other emerging video technologies for ideation, visual creation, animation, enhancement and post-production.
- Develop strong visual treatments, transitions, graphics and storytelling techniques to improve the overall quality and impact of video content.
- Work closely with content, research, design and creative teams to translate communication requirements into effective video narratives.
- Maintain high standards of visual consistency, technical quality, accuracy and brand alignment across all video outputs.
- Manage multiple video projects simultaneously and ensure timely delivery in a fast-paced content environment.
- Stay updated with evolving video formats, editing styles, social media trends, AI tools and developments in digital content production.
- Mentor and guide junior video editors, provide creative and technical inputs, and help improve overall team capabilities.
